

Project Schedule

Project Name: Unused land ranting system

Task: Person	Week:1					Week:2					Week:3					Week:4					Week:5				
	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
A.1: Safayet	■	■																							
A.2: Rezoana		■	■																						
A.3: Fahad			■	■																					
A.4: Safayet				■	■																				
					◆																				
B.1: Rezoana						■	■																		
B.2: Fahad							■	■	■																
B.3: Safayet								■	■																
B.4: Rezoana									■	■															
										◆															
C.1: Fahad											■	■	■												
C.2: Safayet												■	■	■											
															◆										
D.1: Rezoana																■	■	■							
D.2: Fahad																	■	■							
D.3: Safayet																		■	■	■					
																				◆					
E.1: Fahad																					■	■			
E.2: Rezoana																						■	■	■	
E.3: Safayet																						■	■		
E.4: Rezoana																							■	■	■

Activity key:

A: Generalizing Project and Requirement Analysis

A.1: Defines the roles and responsibilities of the project management team.

A.2: Identifying needs and benefits

A.3: Establishing project requirements

A.4: Fulfil the project requirement and defining project requirement

B: Designing Phase 1

B.1: Designing Use case Diagram

B.2: Designing Mock Design

B.3: Designing Activity Diagram

B.4: Designing UML Class Diagram

C: Designing Phase 2

C.1: Putting Project Status on JIRA

C.2: Making timeline chart

D: Coding

D.1: Coding part1

D.2: Coding part2

D.3: Coding part3

E: Testing & Deploying

E.1: Testing and Checking for bugs in the system

E.2: Generate test case and test data for the testing process

E.3: Fixing bugs

E.4: Deploying the system
